01

Hiring is Broken

The traditional hiring pipeline is full of friction, bias, and broken trust.

Resume Theater

Self-reported skills miss the truth. Employers can't verify narratives.

Negotiation Asymmetry

Employers hold market data.
Candidates negotiate blind.

Trust Deficit

No payment guarantees. No verifiable agreements. No recourse.

AI + Blockchain, End-to-End

From data-driven resumes to autonomous negotiation to on-chain settlement — one seamless pipeline.

01

AI Resume Generation

AI analyzes real GitHub activity data to generate objective, vector-embedded resumes.

02

Autonomous Negotiation

AI agents represent both sides through encrypted multi-round negotiation.

03

Blockchain Escrow

NEAR smart contracts guarantee payment. Agreements recorded on-chain.

03

User Journey

Two paths converge into a shared, AI-driven, on-chain pipeline.

JOB SEEKER

- 1 Sign Up with NEAR Wallet
- 2 Connect Data Sources
- 3 AI Generates Resume
- 4 AI Matching

EMPLOYER

- 1 Sign Up with NEAR Wallet
- 2 Create Job with AI Chat
- 3 Deposit Escrow
- 4 AI Matching

Auto Negotiation Begins

STEP 5

AI Negotiation

STEP 6

Agreement Signing

STEP 7

On-Chain Settlement

Built on NEAR, Through and Through

Deep integration across the entire NEAR ecosystem — from AI inference to on-chain settlement.

AI INFERENCE

NEAR AI Cloud

Qwen 3.5-122B reasoning + Qwen 3-Embed-0.6B vector embeddings.

AUTHENTICATION

NEAR Protocol

NEP-413 wallet-native login. No passwords. Your NEAR account *is* your identity.

SMART CONTRACTS

Rust Contracts

Escrow + Agreement contracts with SHA-256 verification. Deployed on testnet.

DELEGATION

FunctionCall Access Keys

Server agent key with capped allowance. Automated on-chain transactions, zero-trust.

System Architecture

Four modular layers from client to blockchain.

Under the Hood

Technical innovations that make TalentTee possible.

01

Hybrid AI Matching

pgvector ANN search + LLM reranking. Speed meets precision.

02

Encrypted Negotiation

Ed25519 → HKDF → AES-GCM. Every round is end-to-end encrypted.

03

Agent Delegation

FunctionCall Access Keys with capped allowance. Zero-trust automation.

04

Integrity Verification

SHA-256 hashed agreements recorded on NEAR. Tamper-proof.

Current Status

A working full-stack MVP, live on NEAR testnet.

Phases Complete

Live
On Testnet

Full
Stack MVP

- AI resume generation from real GitHub activity data
- Vector-based job matching with LLM reranking (pgvector + NEAR AI)
- Multi-round encrypted AI negotiation powered by NEAR AI
- Smart contract escrow deployed on NEAR testnet
- Frontend on Vercel, Backend on Railway — fully deployed

talenttee-sepia.vercel.app

What's Next

A clear path from hackathon prototype to production platform.

Q2 2026

Polish & Integrate

Pre-negotiation auto-payment +
resume integration

Salary chat flow with AI
recommendations

Post-agreement interview messaging

End-to-end test coverage expansion

Q3 2026

Scale & Expand

Mainnet deployment

Multi-source integration (LinkedIn,
portfolio)

Advanced matching with feedback
loops

Platform fee mechanism & revenue
model

Q4 2026

Launch & Grow

Platform marketplace public launch

Employer dashboard with analytics

Token economics design

Community governance exploration

TalentTee.

The future of hiring is autonomous,
encrypted, and on-chain.
